🔴 Le choix du quantifieur dépend du type de phrase (affirmative, négative, question), du caractère dénombrable ou non du nom, et du sens visé (totalité, quantité faible, élément par élément).

1. Some / Any / No / Every + composés

FORME	USAGE	EXEMPLE
some / somebody / something / somewhere	Phrase affirmative, offre ou demande	We need some data. Would you like something to drink?
any / anybody / anything / anywhere	Négation, question, « n'importe quel »	We don't have any data. Is anybody there?
no / nobody / nothing / nowhere	Négation forte (sans « not »)	Nobody answered the phone.
every / everybody / everything / everywhere	Totalité, généralisation	Everybody agrees with the plan.

2. Each / Every / One / Other / Another · Little / Few

MOT	USAGE	EXEMPLE
each	Chaque élément pris individuellement (groupe limité)	Each engineer submitted a report.
one ... the other	Deux éléments : l'un / l'autre	One test passed, the other failed.
another / the other(s)	Un élément de plus (indéfini) / le reste du groupe	Can I have another sample? The others left early.
a little / little (+ indénombrable)	Un peu (positif) / presque pas (négatif)	We have a little time. We have little time left — hurry.
a few / few (+ dénombrable)	Quelques (positif) / presque pas (négatif)	I found a few errors. Few students understood the proof.

💡 Astuce : any s'utilise dans les questions et négations, some dans les affirmations (et les offres). little/few = presque pas (négatif) ; a little/a few = un peu, quelques (positif).
