

V04 — Connectors & Discourse Markers

Les connecteurs logiques et marqueurs de discours

 B1-B2	 S3-S4	 marc.vasseur@polytech-lille.fr
---	---	--

📌 Les connecteurs permettent de structurer un discours écrit ou oral. Indispensables pour les rapports, les présentations et les essais académiques.

1. Addition, opposition et concession

FONCTION	CONNECTEURS	EXEMPLE
Addition	Furthermore, Moreover, In addition, Besides, What is more	Furthermore, the results confirm the hypothesis.
Opposition forte	However, Nevertheless, Nonetheless, Yet, On the contrary	However, the data suggests otherwise.
Concession	Although, Even though, Despite, In spite of, While, Whereas	Although expensive, the solution is effective.
Contraste	On the one hand... on the other hand, While, Whereas	On the one hand it's fast; on the other it's costly.
Alternative	Instead, Alternatively, Or else	Alternatively, we could outsource the process.

2. Cause, conséquence et but

FONCTION	CONNECTEURS	EXEMPLE
Cause	Because, Since, As, Due to, Owing to, On account of	Due to budget constraints, we had to delay.
Conséquence	Therefore, Thus, Hence, Consequently, As a result, This means that	Consequently, the project was cancelled.
But / Objectif	In order to, So as to, So that, With a view to	In order to reduce costs, we automated the process.
Condition	If, Unless, Provided that, As long as, On condition that	Provided the data is accurate, we can proceed.
Temps	When, While, As soon as, Once, After, Before, By the time	Once the analysis is complete, we will report.

3. Illustration, exemple et conclusion

FONCTION	CONNECTEURS	EXEMPLE
Illustration	For example, For instance, Such as,	For instance, solar panels can

marc.vasseur@polytech-lille.fr — PEIP2 — Polytech Lille

FONCTION	CONNECTEURS	EXEMPLE
	Including	reduce costs.
Clarification	That is (i.e.), In other words, Namely	The process is iterative, i.e., it repeats.
Résumé / conclusion	In conclusion, To sum up, In summary, Overall, To conclude	In conclusion, the method is effective.
Emphase	Indeed, In fact, As a matter of fact, Clearly, Obviously	Indeed, the results speak for themselves.
Séquence	First(ly), Second(ly), Then, Subsequently, Finally	Firstly, collect data. Then, analyse it.

EXERCICES

Exercice 1 — Choisis le connecteur approprié

Complète avec le connecteur logique le plus approprié.

1. The experiment was successful. _____, further testing is required.
→ _____
2. _____ the high cost, the solution proved highly effective.
→ _____
3. We chose renewable energy _____ reduce our carbon footprint.
→ _____
4. _____, the results confirm the initial hypothesis.
→ _____
5. The data was incomplete. _____, we could not draw firm conclusions.
→ _____
6. _____ the new protocol is implemented, results should improve.
→ _____
7. The system failed, _____ it had been tested multiple times.
→ _____
8. _____, the project was a complete success.
→ _____
9. _____, solar and wind energy can significantly reduce emissions.
→ _____
10. The process is automated, _____ it runs without human intervention.
→ _____

Exercice 2 — Reformulation avec connecteurs (B2)

Relie les deux phrases avec le connecteur approprié.

1. The budget was reduced. The project was delayed. (conséquence)
→ _____
2. The system is expensive. It is highly reliable. (opposition)
→ _____
3. We tested the prototype. We submitted the final report. (ordre temporel)
→ _____
4. The data is accurate. The model will produce reliable predictions. (condition)
→ _____
5. She is an expert in thermodynamics. She specialises in heat transfer. (précision)
→ _____

✓ CORRIGÉS

Exercice 1 — Choisis le connecteur approprié

N°	Phrase / Question	✓ Réponse
1	The experiment was successful. _____, further testing is required.	However / Nevertheless
2	_____ the high cost, the solution proved highly effective.	Despite / In spite of
3	We chose renewable energy _____ reduce our carbon footprint.	in order to
4	_____, the results confirm the initial hypothesis.	Overall / In conclusion
5	The data was incomplete. _____, we could not draw firm conclusions.	Consequently / As a result
6	_____ the new protocol is implemented, results should improve.	Once / As soon as
7	The system failed, _____ it had been tested multiple times.	even though / although / despite the fact that
8	_____, the project was a complete success.	Overall / To sum up / In conclusion
9	_____, solar and wind energy can significantly reduce emissions.	For example / For instance
10	The process is automated, _____ it runs without human intervention.	i.e., / that is,

Exercice 2 — Reformulation avec connecteurs (B2)

N°	Phrase / Question	✓ Réponse
1	The budget was reduced. The project was delayed. (conséquence)	The budget was reduced. Consequently / As a result, the project was delayed.
2	The system is expensive. It is highly reliable. (opposition)	Although the system is expensive, it is highly reliable.
3	We tested the prototype. We submitted the final report. (ordre temporel)	After testing the prototype, we submitted the final report.
4	The data is accurate. The model will produce reliable predictions. (condition)	Provided the data is accurate, the model will produce reliable predictions.
5	She is an expert in thermodynamics. She specialises in heat transfer. (précision)	She is an expert in thermodynamics, namely heat transfer.
