100 questions — réponses attendues

Fiche 1 — Intelligence artificielle & données

N°	Phrase	✓ Question attendue	Temps
1	The AI model processes new data every hour.	How often does the AI model process new data?	Present Simple
2	The engineers are training a new neural network this week.	What are the engineers training this week?	Present Continuous
3	The startup has hired twelve data scientists this year.	How many data scientists has the startup hired this year?	Present Perfect Simple
4	The company released its first chatbot in 2021.	When did the company release its first chatbot?	Past Simple
5	Two researchers were reviewing the algorithm when they found the bug.	Who were reviewing the algorithm when they found the bug?	Past Continuous
6	The team will present their findings in Geneva.	Where will the team present their findings?	Future Simple
7	The company is going to launch a new AI assistant.	What is the company going to launch?	Be going to
8	She has been coding this application for three months.	How long has she been coding this application?	Present Perfect Continuous
9	By the time the update was released, the bug had already affected thousands of users.	What had already affected thousands of users by the time the update was released?	Past Perfect Simple
10	By 2030, the lab will have trained over a hundred AI models.	How many AI models will the lab have trained by 2030?	Future Perfect

Fiche 2 — Énergie renouvelable & climat

N°	Phrase	✓ Question attendue	Temps
1	Engineers prefer solar panels because they reduce carbon emissions.	Why do engineers prefer solar panels?	Present Simple
2	New wind turbines are transforming the region's energy supply.	What is transforming the region's energy supply?	Present Continuous
3	The plant has reduced its emissions by thirty per cent.	By how much has the plant reduced its emissions?	Present Perfect Simple
4	The engineers travelled two hundred kilometres to inspect the wind farm.	How far did the engineers travel to inspect the wind farm?	Past Simple
5	The team was monitoring emission levels at 6 AM yesterday.	When was the team monitoring emission levels?	Past Continuous
6	The new regulations will affect every manufacturer in the country.	What will affect every manufacturer in the country?	Future Simple
7	The city is going to choose a new supplier for green electricity.	What is the city going to choose?	Be going to
8	The committee had already rejected two proposals before approving this one.	How many proposals had the committee already rejected before approving this one?	Past Perfect Simple
9	Scientists have been measuring sea levels since 1990.	Since when have scientists been measuring sea levels?	Present Perfect Continuous
10	If the price of batteries keeps falling, electric heating will become standard.	What will become standard if the price of batteries keeps falling?	First Conditional

Fiche 3 — Exploration spatiale

N°	Phrase	✓ Question attendue	Temps
1	The agency launches a new satellite roughly twice a year.	How often does the agency launch a new satellite?	Present Simple
2	The probe is currently approaching the outer edge of the solar system.	What is the probe currently approaching?	Present Continuous
3	The mission has cost the agency almost two billion euros.	How much has the mission cost the agency?	Present Perfect Simple
4	The rover discovered traces of frozen water beneath the surface.	What did the rover discover beneath the surface?	Past Simple
5	The crew were repairing the solar panel when the alarm went off.	When were the crew repairing the solar panel?	Past Continuous

6	The next spacecraft will carry four astronauts to the station.	How many astronauts will the next spacecraft carry to the station?	Future Simple
7	The agency is going to send a robotic lander to the moon's south pole.	Where is the agency going to send a robotic lander?	Be going to
8	The engineers will have finished testing the new engine by next spring.	When will the engineers have finished testing the new engine?	Future Perfect
9	The satellite had already left orbit before the ground team noticed the fault.	What had already left orbit before the ground team noticed the fault?	Past Perfect Simple
10	If the launch window closes, the mission will be delayed by a month.	By how long will the mission be delayed if the launch window closes?	First Conditional

Fiche 4 — Biotechnologie & santé

N°	Phrase	✓ Question attendue	Temps
1	The laboratory tests new compounds several times a week.	How often does the laboratory test new compounds?	Present Simple
2	The team is currently trialling the vaccine on volunteers.	Who is the team currently trialling the vaccine on?	Present Continuous
3	Researchers have identified a gene linked to the disease.	What have researchers identified?	Present Perfect Simple
4	The hospital treated more than three thousand patients last winter.	How many patients did the hospital treat last winter?	Past Simple
5	She was analysing the samples when she noticed the contamination.	When was she analysing the samples?	Past Continuous
6	The clinic will open a new research wing next autumn.	When will the clinic open a new research wing?	Future Simple
7	The institute is going to recruit fifty volunteers for the trial.	How many volunteers is the institute going to recruit for the trial?	Be going to
8	They have been developing this treatment since 2018.	Since when have they been developing this treatment?	Present Perfect Continuous
9	By the time the results came in, the patient had already recovered.	Who had already recovered by the time the results came in?	Past Perfect Simple
10	If researchers had found the mutation earlier, the clinical trial would have started in spring.	When would the clinical trial have started, if researchers had found the mutation earlier?	Third Conditional

Fiche 5 — Cybersécurité & réseaux

N°	Phrase	✓ Question attendue	Temps
1	The system scans the network for threats every few minutes.	How often does the system scan the network for threats?	Present Simple
2	The security team is currently investigating a data breach.	What is the security team currently investigating?	Present Continuous
3	The company has suffered three cyberattacks this year.	How many cyberattacks has the company suffered this year?	Present Perfect Simple
4	A hacker accessed the database through an outdated plugin.	How did a hacker access the database?	Past Simple
5	The analysts were tracing the attack when the server went offline.	When were the analysts tracing the attack?	Past Continuous
6	The firm will update its firewall next week.	When will the firm update its firewall?	Future Simple
7	The bank is going to introduce two-factor authentication for all accounts.	What is the bank going to introduce for all accounts?	Be going to
8	The team will have patched every vulnerability by Friday.	When will the team have patched every vulnerability?	Future Perfect
9	The attackers had already stolen the data before anyone noticed.	Who had already stolen the data before anyone noticed?	Past Perfect Simple
10	If the company doesn't train its staff, breaches will keep happening.	What will keep happening if the company doesn't train its staff?	First Conditional

Fiche 6 — Robotique & automatisation

N°	Phrase	✓ Question attendue	Temps
1	The factory uses robots for most of its assembly lines.	What does the factory use robots for?	Present Simple

2	The engineers are currently calibrating the robotic arm.	What are the engineers currently calibrating?	Present Continuous
3	The plant has automated nearly sixty per cent of its production.	How much of its production has the plant automated?	Present Perfect Simple
4	The team built the first prototype in only six weeks.	How long did it take the team to build the first prototype?	Past Simple
5	A technician was adjusting the sensor when it suddenly stopped working.	Who was adjusting the sensor when it suddenly stopped working?	Past Continuous
6	The new robots will replace some of the manual tasks.	What will the new robots replace?	Future Simple
7	The company is going to double its robotic workforce next year.	When is the company going to double its robotic workforce?	Be going to
8	The engineers have been improving the robot's balance since January.	Since when have the engineers been improving the robot's balance?	Present Perfect Continuous
9	By the time the inspector arrived, the robot had already completed the task.	What had already completed the task by the time the inspector arrived?	Past Perfect Simple
10	If the sensors had been more accurate, the robot wouldn't have collided with the shelf.	What wouldn't the robot have collided with, if the sensors had been more accurate?	Third Conditional

Fiche 7 — Télétravail & carrières modernes

N°	Phrase	✓ Question attendue	Temps
1	Many engineers now work from home twice a week.	How often do many engineers now work from home?	Present Simple
2	Her team is currently trialling a four-day week.	What is her team currently trialling?	Present Continuous
3	The company has hired remote employees from twelve different countries.	How many different countries has the company hired remote employees from?	Present Perfect Simple
4	She moved to Lisbon because her company allowed remote work.	Why did she move to Lisbon?	Past Simple
5	He was attending a video call when the connection failed.	When was he attending a video call?	Past Continuous
6	The firm will introduce flexible hours next quarter.	When will the firm introduce flexible hours?	Future Simple
7	The manager is going to reorganise the whole team.	What is the manager going to reorganise?	Be going to
8	She will have finished her onboarding by the end of the week.	When will she have finished her onboarding?	Future Perfect
9	He had already changed jobs three times before turning thirty.	How many times had he already changed jobs before turning thirty?	Past Perfect Simple
10	If the company paid better salaries, more engineers would stay.	Who would stay if the company paid better salaries?	Second Conditional

Fiche 8 — Véhicules électriques & transport

N°	Phrase	✓ Question attendue	Temps
1	The city charges electric buses overnight at the depot.	Where does the city charge electric buses overnight?	Present Simple
2	The manufacturer is currently testing a new battery design.	What is the manufacturer currently testing?	Present Continuous
3	Sales of electric vehicles have doubled in the last two years.	When have sales of electric vehicles doubled?	Present Perfect Simple
4	The company opened its first charging station in Lille.	Where did the company open its first charging station?	Past Simple
5	The engineers were road-testing the prototype when it broke down.	When were the engineers road-testing the prototype?	Past Continuous
6	The new model will travel four hundred kilometres on a single charge.	How far will the new model travel on a single charge?	Future Simple
7	The government is going to ban new petrol cars from 2035.	When is the government going to ban new petrol cars?	Be going to
8	They have been developing this battery technology for almost a decade.	How long have they been developing this battery technology?	Present Perfect Continuous
9	By the time the subsidy ended, the factory had already sold ten thousand cars.	How many cars had the factory already sold by the time the subsidy ended?	Past Perfect Simple
10	If the battery had been lighter, the car would have gone further.	How would the car have performed differently, if the battery had been lighter?	Third Conditional

Fiche 9 — Informatique quantique & innovation

N°	Phrase	✓ Question attendue	Temps
1	The lab runs quantum experiments almost every day.	How often does the lab run quantum experiments?	Present Simple
2	The team is currently building a more stable qubit.	What is the team currently building?	Present Continuous
3	The university has published several papers on quantum encryption.	What has the university published?	Present Perfect Simple
4	The researchers achieved a major breakthrough last spring.	When did the researchers achieve a major breakthrough?	Past Simple
5	She was presenting her research when a journalist interrupted.	When was she presenting her research?	Past Continuous
6	This technology will transform the entire computing industry.	What will this technology transform?	Future Simple
7	The startup is going to raise funds for its quantum chip.	What is the startup going to raise funds for?	Be going to
8	By 2035, engineers will have built far more powerful quantum computers.	What will engineers have built by 2035?	Future Perfect
9	The prototype had already failed twice before the team fixed the cooling system.	How many times had the prototype already failed before the team fixed the cooling system?	Past Perfect Simple
10	If the funding hadn't been approved, the project would have been cancelled.	What would have been cancelled, if the funding hadn't been approved?	Third Conditional

Fiche 10 — Ingénierie durable & villes intelligentes

N°	Phrase	✓ Question attendue	Temps
1	The city monitors air quality in real time.	How does the city monitor air quality?	Present Simple
2	Engineers are currently redesigning the water treatment plant.	What are engineers currently redesigning?	Present Continuous
3	The council has planted over five thousand trees this decade.	How many trees has the council planted this decade?	Present Perfect Simple
4	The city built its first smart grid in 2017.	When did the city build its first smart grid?	Past Simple
5	The team was installing new sensors when the storm hit.	When was the team installing new sensors?	Past Continuous
6	The new district will reduce energy consumption by forty per cent.	By how much will the new district reduce energy consumption?	Future Simple
7	The municipality is going to convert the old factory into a research hub.	What is the municipality going to convert the old factory into?	Be going to
8	Residents have been recycling almost all their waste since the new policy.	What have residents been recycling since the new policy?	Present Perfect Continuous
9	By the time the report was published, the city had already reduced its emissions.	What had the city already reduced by the time the report was published?	Past Perfect Simple
10	If the city invested more in public transport, traffic would decrease significantly.	What would decrease significantly, if the city invested more in public transport?	Second Conditional
